

The foundation of Adolfson & Peterson Construction is our people. We are looking for individuals with talent, initiative and drive to help take our company to new levels of expertise. If you're looking for an exceptional opportunity with a company that offers numerous career experiences nationally, Adolfson & Peterson may be the place for you.

We have an excellent opportunity available in our Denver, CO region for the right candidate to become our newest MEP Coordinator. This role is exciting, fast-paced and offers the opportunity not only to work for an industry leader, but also to be a key part of a fast-growing team and have a direct impact on driving business. Personal and professional growth opportunities in this kind of environment are virtually limitless. Put your mechanical, electrical, technical & plumbing skills and expertise to use for us and find out just how rewarding your next career can be. Apply today!

Primary Responsibilities:

The MEP Coordinator will report directly to the Pre-Construction Director and work closely with the Estimating, Business Development and Project Management team. Responsibilities include, but not limited to: Pre-construction services, mechanical and electrical system recommendations and pricing, as well as knowledge and efficiency with commissioning and bidding.

Participate in conceptual & schematic designing and design meetings.

Attend all M/E pre-bid meetings and commissioning meetings.

Read and comprehend drawings and specifications, and visualizing the items not clearly shown.

LEED understanding and participation.

Prepare accurate quantity surveys when required and assisting with MEP pricing issues.

Assist other preconstruction services personnel in preparing conceptual estimates.

Develop RFPs and work with sub-contractors for budgetary pricing/interest in projects.

Lead Site visits and investigations.

Work closely with client/owner and rest of project team.

Qualifications include: Preferred resumes will highlight an engineering background and reflect previous design/build, pre-construction and/or estimating skills.

A Bachelor's degree in Mechanical Engineering or Construction Management.

A minimum of 8 years of experience in commercial or industrial construction, including a least five years of mechanical or electrical experience.

Experience should include a minimum of five years of design in a related field and/or project management.

Familiar with and understands the different methods and techniques employed in commercial and industrial construction in relation to MEP disciplines

Attention to detail with strong communication skills both verbal and written.

A professional engineering license is desirable, but not required.

Adolfson & Peterson Construction employees enjoy a full range of comprehensive benefits, including competitive salaries, medical & dental coverage, retirement benefits and continuing education opportunities.

A healthy atmosphere is created by diversity: equal opportunity employer M/F/D/V.
